Genevieve (Meisner) White
Written by Addy Kirby

Genevieve White, previously Meisner, is a radiologic technologist/mammographer. She graduated in the class of 2012. Following high school, Genevieve went to college and completed a year of general education classes before being accepted into the radiologic technologist/mammographer program. When asked how she got where she is today she said, "My grandma was diagnosed with cancer and I went with her to one of her appointments where I watched her get X-rays taken. I absolutely fell in love with the career then. I went to NICC in Peosta where I did clinicals. After I graduated, I got a job at Finley in Dubuque and MercyOne Elkader Medical Center in Elkader. After a couple months I was offered a full time position in Elkader where I continued to work for 5 years. While there I got to further my education by becoming certified in Mammography and also learned CT. I now work at Regional Medical Center and get to do all of that here." Her favorite part about high school was "Going to All State in Large group speech for Choral Reading will always be one of my favorite memories from high school. Also hitting my home run in softball at the Jesup tournament! Environmental Science with Mr. Millis will always be one of my favorite classes! You learn so much and get a break from sitting in a classroom all day! I would tell any student to take that class!" The advice she would give to current students is "You're going to make mistakes, learn from them. Don't ever be afraid to ask a question and do what is best for you. Work your butt off now so you can enjoy your life later. It will definitely be worth it!" Genevieve is doing things the Viking way! Once a Viking, always a Viking.
